On 31 December 2021, Fortum’s ownership in Uniper was 78%. Uniper is a European corporation (Societas Europaea – SE). The General Meeting of Shareholders may decide on matters falling within its competence under the law or the articles of association of the company. The Management Board submits the annual financial statements and the reporting required by law to the General Meeting. The General Meeting adopts resolutions on the appropriation of net profit, discharges the Management Board and the Supervisory Board and elects the shareholder representatives to the Supervisory Board, and the external auditor.

A new Supervisory Board for Uniper was appointed on 19 May 2021. Uniper’s Supervisory Board consists of 12 members with equal powers; 6 appointed by the shareholders and 6 appointed by the employees. Markus Rauramo, the President and CEO of Fortum Corporation is the Chair of the Supervisory Board. In addition to Markus Rauramo, the other shareholder representatives from Fortum are: Bernhard Günther, CFO; Esa Hyvärinen, Head of the CEO Office; and Nora Steiner-Forsberg, General Counsel. The Supervisory Board is responsible for appointing and removing the members of the Management Board and monitoring the management of Uniper by the Management Board.
The Management Board of Uniper manages the company under its own responsibility in accordance with applicable laws, the provisions of corporate by-laws and the rules of procedure for the Management Board and the Supervisory Board, as well as the resolutions of the General Meeting of shareholders.

The Management Board is appointed by Uniper’s Supervisory Board. The Management Board is not subject to instructions by the Supervisory Board, the General Meeting of Shareholders, or individual shareholders.

Pursuant to section 161 of the German stock corporation act (Aktiengesetz), the Management Board and the Supervisory Board of Uniper have to annually issue a declaration that Uniper has been, and is, in compliance with the recommendations of the Government Commission on the German Corporate Governance Code or to advice of any recommendations that have not been, or are not being, applied and the reasons for this.

**Governance processes in Uniper**

Fortum’s governance model, including the responsibilities and operational structures, works as described in this statement. Uniper shares Fortum’s view on how to prudently steer the business activities and on the governance process, although its current steering models and governance processes do not directly have Fortum’s practices as their basis.

Risk management systems
Fortum’s Board of Directors approves the Group Risk Policy that defines the objective, main principles and division of responsibilities for risk management. The Group Risk Policy also includes a description of the main features of the risk management process applicable to all processes, including financial reporting.

Internal controls in relation to financial reporting
Fortum’s internal control framework is based on the main elements of the framework introduced by the Committee of Sponsoring Organisations of the Treadway Commission (COSO). The controls, including financial reporting controls have been defined based on the main risks in the process. Internal controls are one of the key elements of the Compliance Programme in Fortum, which also covers business ethics and regulatory compliance.

Control environment
The standards, processes and structures in internal control are set through Group policies, Group instructions and the Fortum internal control framework. Fortum’s internal control framework is designed to support operational effectiveness and efficiency, reliable financial reporting, and compliance with laws, regulations and policies. The internal control framework defines the key controls and the minimum requirements for the key processes. Corporate Accounting and Control is responsible for the overall control structure of the financial reporting process. Fortum Controllers’ manual defines the instructions and guidelines relating to financial reporting.

Fortum has a decentralised organisational model, and a substantial degree of authority and responsibility has been delegated to the divisions in the form of control responsibilities. Fortum’s control governance applies the so-called “Three lines of defense” model as illustrated in the graphic on the next page.

Risk assessment
Risks are regularly identified and analysed as part of the risk management process. Risks that might, if realised, have a material financial impact or lead to non-compliance are reported to the Audit and Risk Committee at least on an annual basis.

Control activities
Control activities are applied in the processes and, from the financial reporting perspective, they ensure that errors or deviations are prevented or detected and corrected.

The Corporate Accounting and Control unit together with the Record-to-Report internal control process team determine the control requirements covering the financial reporting process. Divisions and units define their controls based on these requirements. Responsibilities are assigned for the control activities and for ensuring that the control coverage is in accordance with the requirements. The stream leader of the Record-to-Report ensures the consistency of the control requirements and assessment in the organisation.

Control requirements for the financial reporting process include controls regarding the initiation, recognition, measurement, approval, accounting and reporting of financial transactions as well as disclosure of financial information. The general IT controls support the financial reporting controls in areas such as access control and back-up management.

Responsibilities are assigned to finance functions to ensure that analyses of the business performance, including e.g. volumes, revenue, costs, working capital, and asset valuations are performed in accordance with the control requirements.

Information and communication
The Controllers’ manual includes the Fortum Accounting manual, Investment manual and reporting instructions, and also other instructions relating to financial reporting. Regular core controllers’ meetings, headed by the Vice President, Accounting&Reporting, steer the finance function. Accounting Network Forum meetings are held regularly to inform about upcoming changes in IFRS, new accounting policies and other changes in reporting requirements.

Uniper’s internal control system
In addition to the Code of Conduct and the policies, the corresponding requirements and procedures for the internal control system (ICS) are defined in a consistent Group-wide framework. Uniper’s ICS is based on the globally recognized COSO (The Committee of Sponsoring Organizations of the Treadway Commission) framework and pursues, among other things, compliance with applicable laws and regulations. The goal is to create a control environment for business processes and control activities at an operational process level. These general standards, rules, and structures refer, inter alia, to “Compliance with legal and tax regulations” or “Tone at the top”.

12
Monitoring and follow-up
Financial performance and key risks and uncertainties related to business operations are reported monthly to the Fortum Executive Management.

As part of the Fortum internal control framework, divisions and units regularly assess the maturity of their control activities including the financial reporting process controls. The Group Compliance Officer reports on the results of internal control maturity assessments and identified improvement actions to the management and to the Audit and Risk Committee. Internal control design and operating effectiveness are also assessed as part of the audits carried out by Internal Audit. Audit results, including corrective actions and their status, are regularly reported to the management and to the Audit and Risk Committee.

Internal Audit
Fortum’s Internal Audit is an independent and objective assurance function providing a disciplined and systematic approach to examining and evaluating the appropriateness and effectiveness of Fortum’s management and corporate governance processes, internal control system, risk management, and operational processes.

Internal audit assignments are conducted based on a risk based plan approved by the Audit and Risk Committee. Internal audit reports on the audit results and the status of the audits to the Audit and Risk Committee on a regular basis.

External Audit
The Group and the parent company have one external auditor. Due to the ongoing merger and acquisition processes, some of the target companies may have different audit firms during the transition period. The external auditor is elected by the Annual General Meeting for a term of office that expires at the end of the first Annual General Meeting following the election.

Fortum’s Annual General Meeting 2021 re-elected audit firm Deloitte Oy as the company’s external auditor with Authorised Public Accountant Jukka Vattulainen as principal auditor. The Annual General Meeting 2021 also decided that the auditor’s fee is paid pursuant to invoice approved by the company. The fee paid to the auditor for the services rendered and invoiced in 2021 totalled approx. EUR 3,400,000. In addition, the audit firm was paid a total of approx. EUR 700,000 for the non-audit and advisory services rendered and invoiced.
