

Separation of Fortum Oil through dividend distribution and sale of shares

14 September 2004

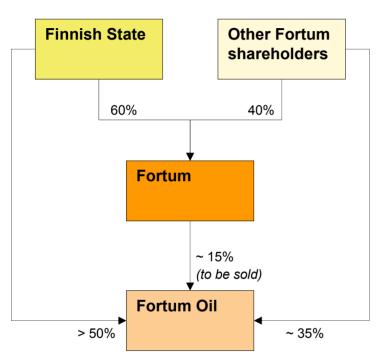

Transaction Highlights

- As a result of strong operating performance in both Power & Heat and Oil, the separation of Fortum Oil is to be implemented through a combination of:
 - Distribution of ~ 85% of Fortum Oil shares as a dividend to the shareholders of Fortum Corporation
 - A sale of ~ 15% of Fortum Oil shares to investors through a marketed offering

- Opportunity for Fortum shareholders to join the future of Fortum Oil and for specialized oil investors to buy Fortum Oil shares
- Enables Fortum Oil to seek a listing of its shares
- Dividend distribution and sale of the remaining shares planned for April 2005

Transaction Structure Overview

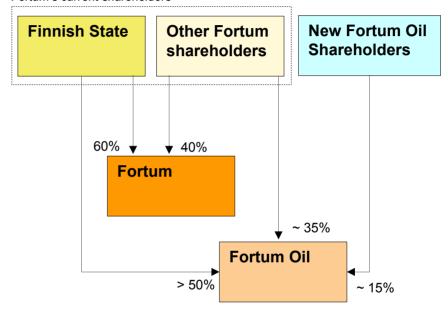

Step 1: Dividend Distribution

- Fortum distributes ~ 85% of Fortum Oil's shares through a dividend to its shareholders
- Finnish State maintains a direct majority interest (>50%)
 - Finnish State receives Fortum Oil shares in proportion to its holding in Fortum (currently ~ 60%)

Step 2: Sale of the Remaining Shares

Fortum's current shareholders

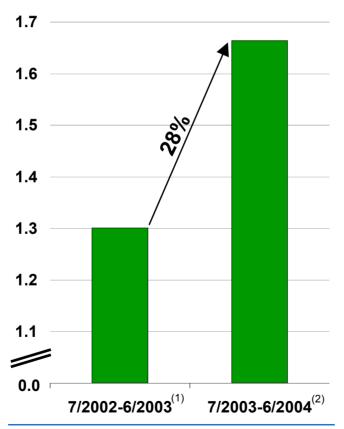

- Concurrently with the dividend distribution, Fortum sells the remaining ~ 15% of Fortum Oil shares to investors by a way of a marketed offering
 - Provides an opportunity for Fortum Oil to market itself to investors
 - Fortum receives proceeds to strengthen its balance sheet after deconsolidating Fortum Oil cash flows

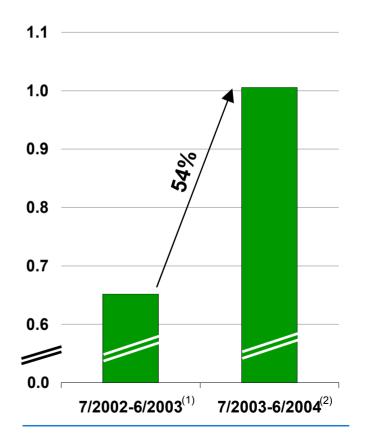

Fortum's Profitability has Significantly Improved During the Last 12 Months...

 Both the Power & Heat and the Oil businesses have significantly improved their performance

Fortum Group EBIT (EUR billion)

Fortum Group Net Income (EUR billion)

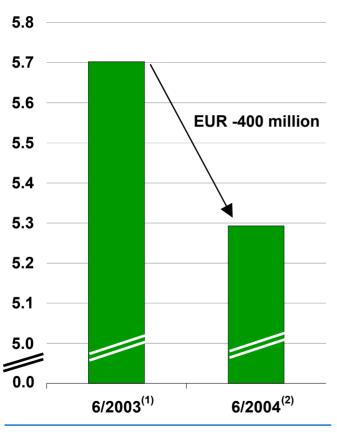

Notes

- 1. Last 12 months as of June 30, 2003
- 2. Last 12 months as of June 30, 2004

... Resulting in Strengthened Balance Sheet

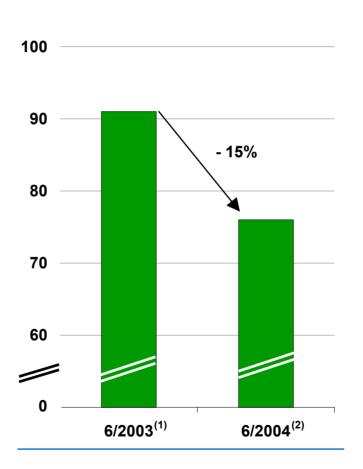

Net Debt (EUR billion)

Notes

- 1. As of June 30, 2003. EUR 1.2 billion in preference shares included in net debt
- 2. As of June 30, 2004

Gearing (%)

The Optimal Structure

- Detailed review of separation alternatives conducted
- Dividend distribution of Fortum Oil shares enables full separation of the two companies
- Clarifies ownership and corporate structure:
 - Establishes Fortum as a "pure play" Nordic power & heat company
 - Provides complete clarity with regards to Fortum Oil's ownership structure given Finnish State direct majority ownership

The Right Timing

- The most cost efficient transaction structure:
 - Dividend distribution in 2005 minimizes total transaction costs
 - Fortum could have faced substantial negative tax consequences due to insufficient tax surpluses if the dividend distribution was to be made in 2004
- Provides high transaction certainty with limited dependence on market conditions

The Best Outcome for Fortum...

- Dividend distribution will leave Fortum with ample financial strength to implement its utility consolidation strategy:
 - Fortum has had strong operating performance over the past 12 months and the near term outlook remains positive
 - Uncompleted acquisition of Hafslund has left Fortum with a stronger balance sheet than expected
 - Sale of Fortum Oil shares provides proceeds to Fortum

... and for Fortum Oil

- Fortum Oil to have a strong platform to implement its strategy
 - Sufficient capitalisation to fund strategy, including the upgrade of Porvoo refinery
 - Approximately EUR 1 billion of net debt (including EUR 130 million of shipping leases) will be transferred to Fortum Oil

Planned Timetable

- Fortum's Board of Directors to formally propose to the Annual General Meeting to distribute ~ 85% of Fortum Oil shares as a dividend to Fortum's shareholders
- Fortum's Annual General Meeting to decide on distribution of Fortum Oil shares as dividend
- Fortum's Board of
 Directors to approve
 the sale of the
 remaining ~ 15% of
 Fortum Oil shares
- Dividend
 distribution and
 sale of remaining
 Fortum Oil
 shares

February

March

April

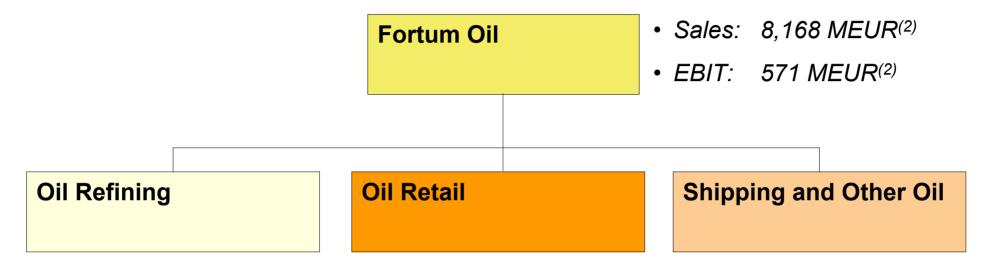

Key Conclusions

- Creation of two truly independent companies, both leaders in their own industries, with focused strategies and financial strength to implement them
- The most cost-efficient alternative for all constituents
- Provides high transaction certainty with limited dependence on market conditions

The best transaction structure for all constituents
